OUR BELT SUPPLY

SEC Group is a distributor of a diverse range of Conveyor Belts. Our range has been developed from engineered product designs that have been tested & proven to provide the highest level of product performance in conveying technology.

Our complete independence provides us with the ability to procure specific belts from recognized Australian & International manufacturers that meet the needs of our customers. This ensures the highest level of quality control at the best value.

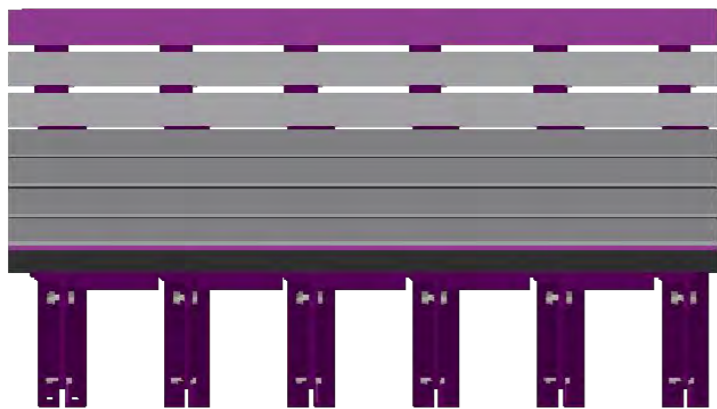

We can supply belting in cut to width specific lengths, full rolls, vulcanized spliced endless belts, belts joined with mechanical belt fasteners or belts with ends prepared for customer own installation.

We only market conveyor belting produced by belting manufacturers who meet or exceed the applicable Australian Standards.
